graphic display solutions

fabric_frame®USA
graphic display solutions

AIT began in 2001 as an equipment manufacturer / supplier to the textile printing industry. In the course of developing applications and products for the industry, AIT introduced the fabric_frame® system to North America.

Accustomed to metal fabrication, AIT developed a line of extrusions for graphic display applications. Since then, we have continued to develop new ideas to enhance the functionality and style of our display systems.

Our number one goal is to provide our customers with the highest level of quality and service. We employ a very skilled staff of design, production, and installation personnel.

Call today to speak with a sales associate.

- Single source turnkey manufacturer
- UL-approved displays & graphic inserts
- High luminance backlit displays

FRAMING OPTIONS

All our extrusions incorporate a groove into which a silicone gasket can be inserted, delivering the perfect presentation of printed graphics. fabric_frame® USA produces 15 or more different extrusions enabling virtually any application.

FF WALL/PLAIN PROFILE

Upgrade existing displays / fixtures by adding extrusions to generate a whole new look with printed fabric graphics. Backlit film boxes, kiosks, armoire, window, and doorway inserts can all be retrofitted with these extrusions to become graphic fabric centerpieces.

ACCESSORIES

Enhance your fabric_frame® display with sound diffusion features, sound systems, fragrant aroma emissions, all of which can be accompanied with a complete line of stand kits, hanging hardware, and rotating display motors. Available finishes include; various powder coated colors, brushed steel, clear anodized and chrome/gold plating.

BACKLIT GRAPHIC DISPLAYS

Grab attention with our high-luminance backlit display frames. Images that stand out with accurate color reproduction. Frames and graphic inserts are easy to install and disassemble. Our proprietary LED and fluorescent backlit displays are also UL-approved.

LED & FLUORESCENT BACKLIT DISPLAYS

- *foldable, lighted textile back panel*
- *plug & play components* and *connections— no electrician required*
- *lightweight shipping & mounting*
- *simple assembly—single tool system*

PROPRIETARY FABRICS

We want to assure our customers the highest quality in custom printed display graphics. We work directly with fabric manufactures to provide the best in quality and durability. Our fabrics are non-reflecting, flame retardant, printed with water-based / solvent free inks. All printed fabrics are washable.

BACKLIT FABRIC

Our proprietary UL-approved backlit fabric is an attention grabber. This fabric has a nice woven finish for a smooth look. Printing on this fabric provides brilliant color, and high-quality reproduction. Just add light for high luminance, eye-catching graphics.

PET FABRIC

Made from 100% recycled plastics our proprietary PET fabric is a tightly knitted material that is excellent for frontlit applications. Printing on this fabric provides brilliant color, and high quality reproduction. Washable and foldable, without wrinkles, makes shipping and storing easy.
